

## ETL Core – ETL Informatica PowerCenter (I)

Duration: 3 Day Course

### Course Goals

The goals of the ETL Informatica PowerCenter training course are:

- To understand the architecture, installation and configuration of Informatica PowerCenter.
- To provide the technical knowledge to develop an ETL, from building the mappings to defining the workflows, and to monitor an ETL execution with Informatica PowerCenter.

### Target Audience

BI Consultants – learn how to develop an ETL with Informatica PowerCenter.

IT Project Managers – get an idea of the cost involved in an ETL development to better estimate and manage your BI project.

### Pre-requisites

Basic ETL knowledge is needed to enrol this course.

### Languages

ETL Informatica PowerCenter is offered in English and Spanish (training material is only available in English).

### Topics covered

Architecture (domain, node, integration service, repository).

Installation & Configuration.

Repository Administration.

Designer (Sources, Targets, Transformations, Mappings, Mapplets).

Workflows Management (Tasks, Sessions, worklets, workflows).

Monitoring.
