

## ETL Core – ETL Oracle Data Integrator

Duration: 3 Day Course

### Course Goals

The goals of the ETL Oracle Data Integrator training course are:

- To understand the architecture, installation and configuration of Oracle Data Integrator.
- To provide the technical knowledge to develop an ETL, from building the interfaces to defining the load plans, and to monitor an ETL execution with Oracle Data Integrator Studio.

### Target Audience

BI Consultants – learn how to develop an ETL with Oracle Data Integrator.

IT Project Managers – get an idea of the cost involved in an ETL development to better estimate and manage your BI project.

### Pre-requisites

Basic ETL knowledge is needed to enrol in this course.

### Languages

ETL Oracle Data Integrator is offered in English and Spanish (training material is only available in English).

### Topics covered

Architecture (database schemas, repositories, ELT vs. ETL, declarative design, agents).

Installation & Configuration.

Repositories Administration. Management of ODI projects.

Oracle Data Integrator Studio: Designer (Models, Interfaces, Packages, Scenarios, Functions, Procedures).

Oracle Data Integrator Studio: Topology Manager (Physical Architecture, Logical Architecture, Contexts, Repositories).

Oracle Data Integrator Studio: Monitoring sessions with Operator.

Oracle Data Integrator Studio: Managing security.
